BACKGROUND: The Instructional Materials Review Committees worked for several months to examine and recommend the most appropriate instructional materials for the above high school courses. The goal of the committees was to recommend materials that would improve learning and understanding for all students enrolled in those courses.

The review process used by the committees has been successfully implemented in the San Francisco Unified School District over the past 15 years for the adoption of instructional materials in all content areas. The recommendations made by the committees are the result of a process that included careful examination of State content standards, the district curriculum, and the State's legal and social compliance guidelines for instructional materials.
